

Biographical Sketch
Frederick G. Pohland

Dr. Frederick G. Pohland is **Professor and Edward R. Weidlein Chair of Environmental Engineering** at the University of Pittsburgh. A **member** of the National Academy of Engineering and a registered **Professional Engineer**, Dr. Pohland is also a **Diplomate** in the American Academy of Environmental Engineers (AAEE), having previously served as its **President**. He has served as consultant and advisor to industry and government, has been a frequent contributor to the literature on solid and hazardous waste management, and is credited with originating the concept of controlled landfills with leachate containment, collection and recirculation that has led to the emergence of the bioreactor landfill as a solid waste management option.
